The tough grain cooling pedestal

- A vertically standing, crop cooling and conditioning system.
- Draws heat out of floor stored crops, helping to maintain crop quality and price.
- Cost effective and flexible solution that ensures crops stay free from moulds and insects.

Stronger by Design

- Recommended for small seeds like Oil Seed Rape.
- No need to have an additional filter for small seeds.
- Louvred slots are less likely to block so equal air distribution is maintained through the crop.
