Woodland Management - West Berks & Oxon Training

Looking after woods and trees on your land can boost their benefits for wildlife, the environment and your business. By growing your woodland effectively, you can harvest a sustainable source of firewood, timber and coppice products, enhance the wood's value for wildlife and increase the resilience of the landscape in the face of threats like pests, diseases and climate change.

Dave Grafton will be coming to Woolley on Thursday 13th February to run a workshop giving advice on how to best manage your Woodland including Maintaining, Conservation and Regulations.

If you would like more information or would like to book onto this workshop please contact Steve or Camilla in the Ring Office.
